

# VIKING BANK

by Jeff Phillips

---

This puzzle consisted of 2 parts:

Part 1 – Clans played a game against a Viking teller to win a set of coins. The clan and the teller would take turns each drawing between 1 and 3 coins from the pile with the goal of being the one to draw the last coin from the pile.

Part 2 – Once clans won the game against the teller, they were left with the coins to solve.
