

# THE WIZARD'S EQUATION

by Ariel Rideout, Ed Huang, Jennifer Louie, Kai Huang and Stanley Chen

To crack the wizard's equation, your clan's total intelligence quotient must be  $TIQ = 729$ .

---

- Write the three treasure words in the spaces below, in alphabetical order.
- If there are any letters  $C$ ,  $D$ ,  $R$ ,  $L$ , or  $S$  (not all will appear), then they represent:
  - $C$  is = (equals)
  - $D$  is - (negative)
  - $R$  is + (plus)
  - $L$  is - (minus)
  - $S$  is  $\times$  (times)
- The remaining letters represent digits, all distinct.
- Numbers with multiple digits never begin with the digit 0 (that would be silly).
